

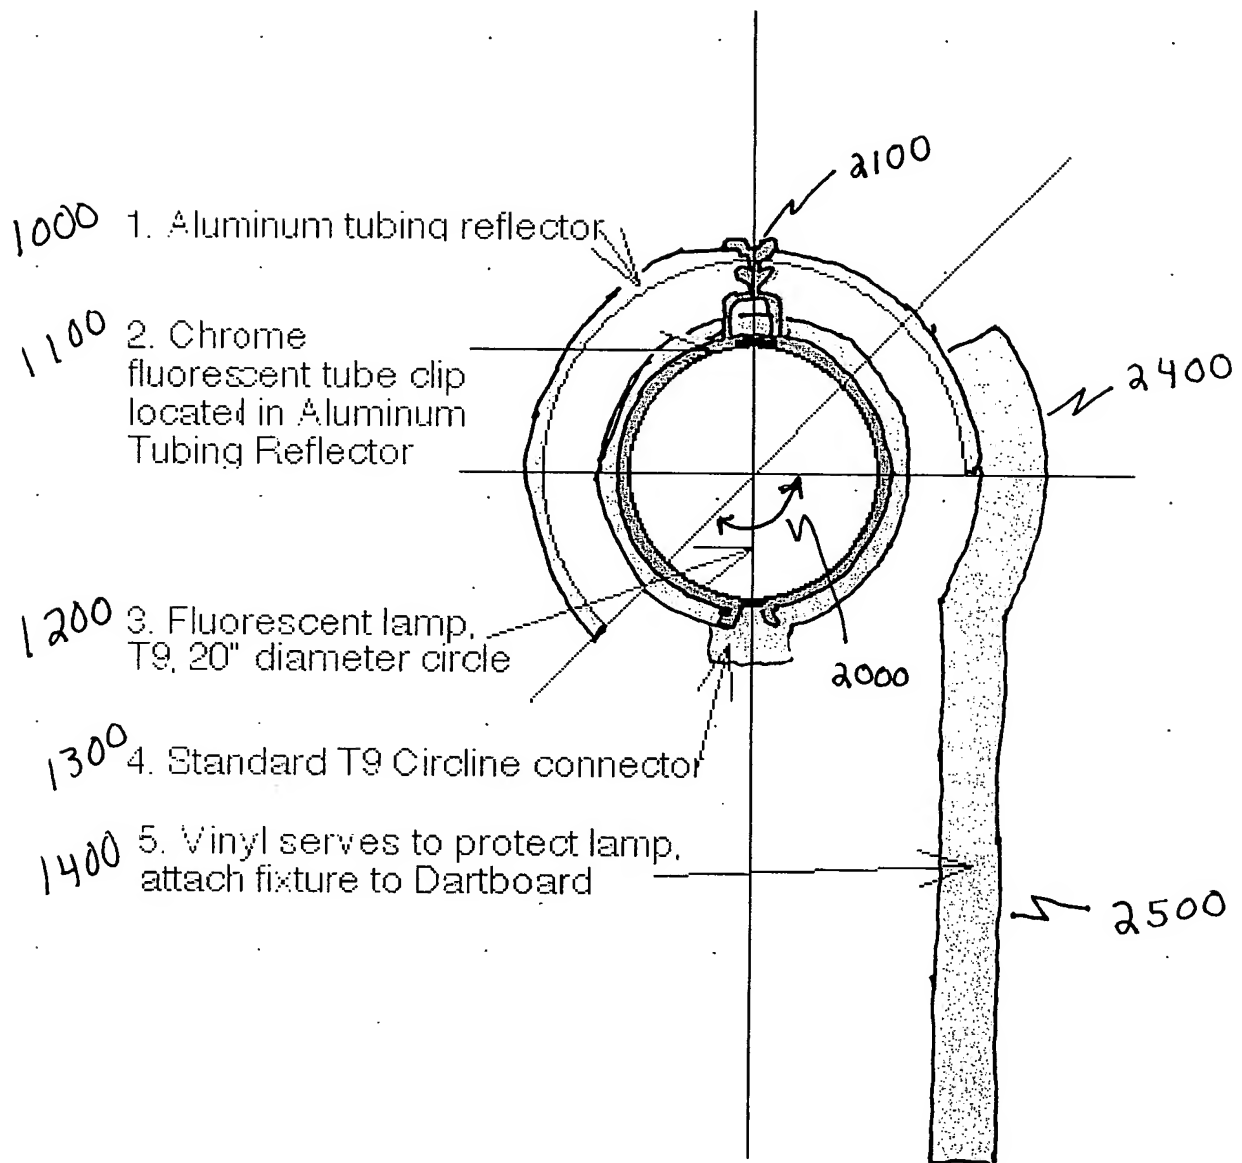

FIG. 1

✓

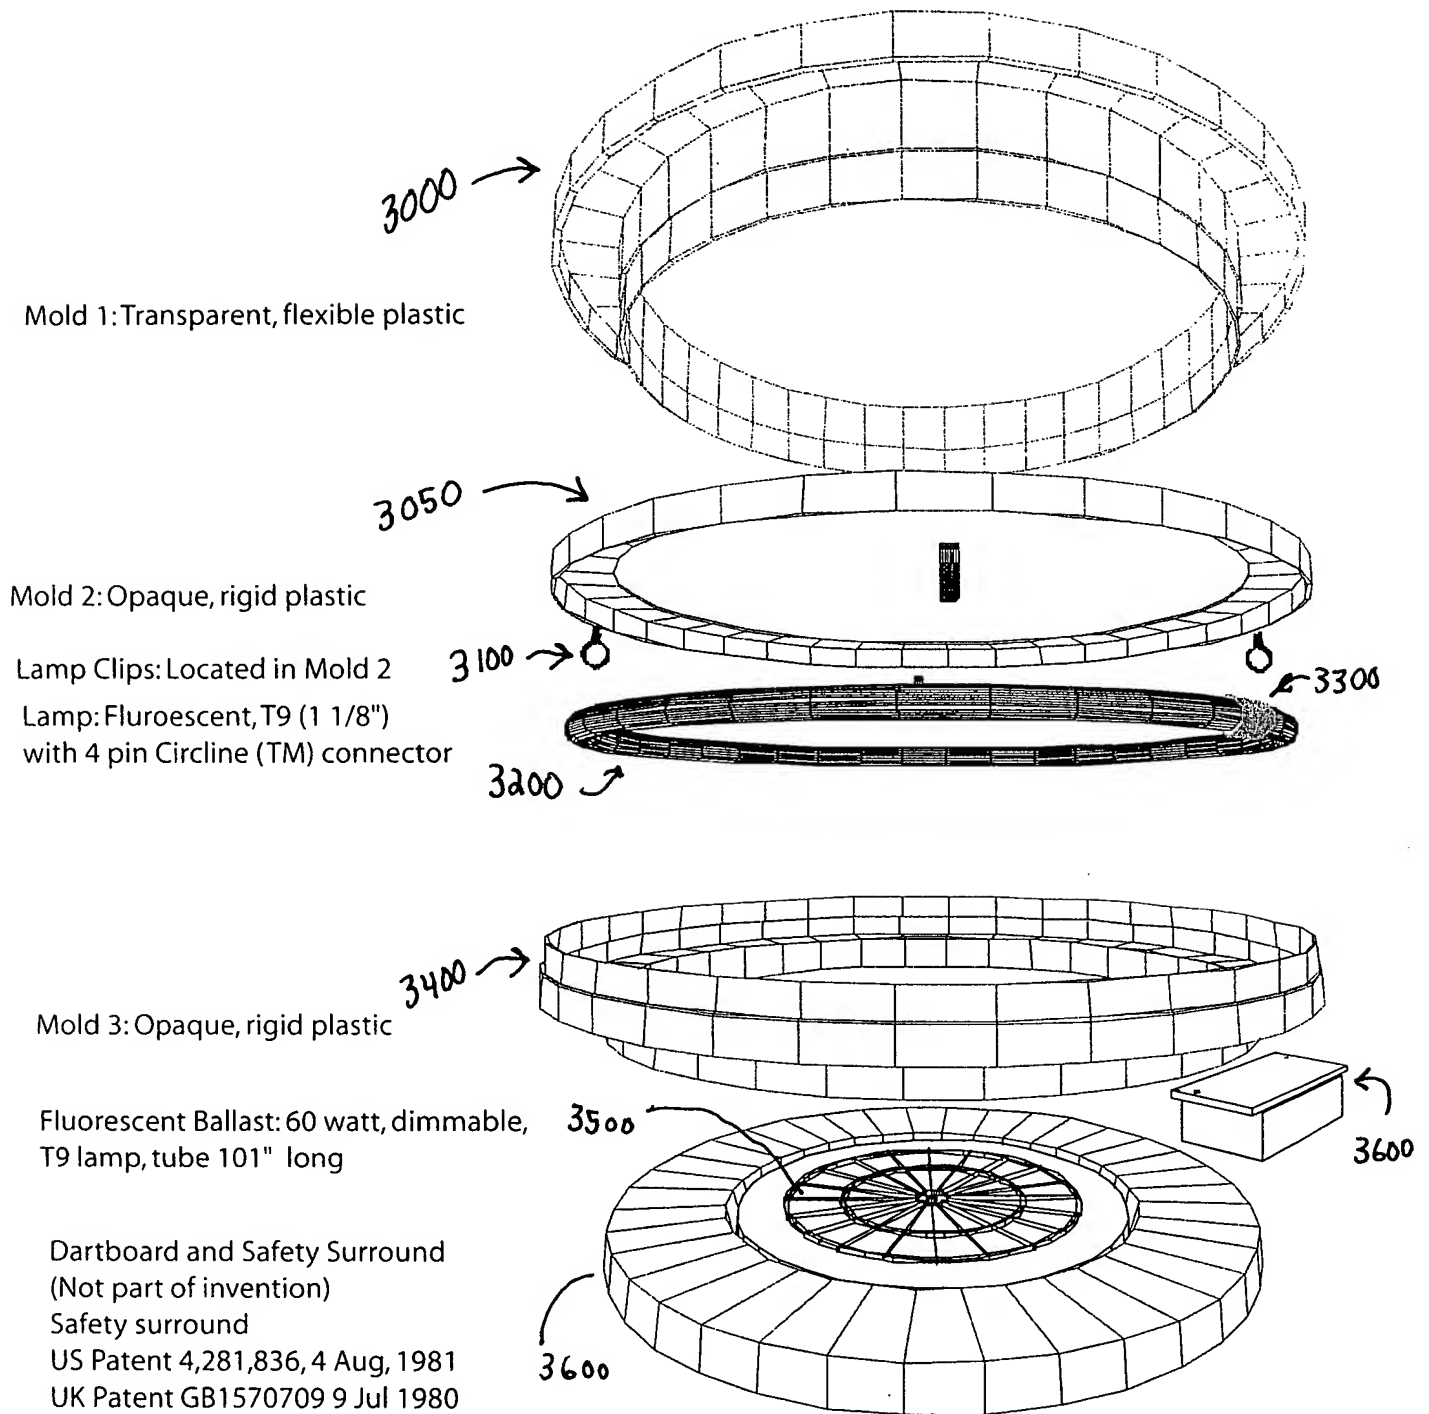

Cross Section of 3 Dimensional Drawing Objects

Note: 3 dimensional drawing produced by sweep extrusion objects above around 20" diameter circle. Objects 2. and 4. extruded along sections of the circle.

FIG. 2

Molded Plastic Light Fixture for Lighting a Dartboard

This version is designed for use with a closed cell foam "Safety Surround" which protects the wall surrounding the dartboard from mis-thrown darts and locates the lamp fixture further from the edge of the dartboard, thereby reducing the possibility of mis-thrown darts hitting the light fixture.
